EPIC CASH — DIGITAL ASSET TERM SHEET

Summary of the Asset and Its Conformity with Core Sharia Precepts

This term sheet summarizes the principal characteristics of EPIC Cash and its conformity with the core precepts of the Sharia.

Requesting Party:	Epicenter Labs Ltd
Submitted for review by:	Dr. Mohamed Ali Elgari
Date:	July 1, 2026

I. Asset Characteristics

Asset	EPIC Cash (ticker: EPIC).
Protocol	MimbleWimble.
Nature	A decentralized, peer-to-peer digital cash protocol. EPIC performs the three functions of money: store of value, medium of exchange, and unit of account. It is borderless and permissionless.
Issuance	No issuer. Every unit is mined into existence. The network is fair-launched, and the supply begins at zero.
Consensus	Proof-of-work. New units are awarded only to the miner who first validates a block and thereby secures the ledger.
Supply	A fixed maximum of 21,000,000 EPIC, reached in the year 2140, on a decreasingly inflationary emission schedule. The supply at any point is known and cannot be increased by any party. Divisible to eight decimal places.
Staking	None. EPIC has no proof-of-stake mechanism. The protocol provides no means to lock or stake coin for a return.
Yield or interest	None. The protocol pays no yield, return, or interest to a holder for holding or locking coin. A reward is paid only for performed validation work.
Privacy	Confidential by default: transaction amounts are concealed and dealings are not publicly linked. The protocol permits the holder to disclose his own transactions selectively, to a counterparty, an auditor, or an authority.
Fungibility	Every unit is equal to and interchangeable with every other, untainted by transaction history.
Ownership and control	Each holder controls his units exclusively through a private key. Only the key-holder can transfer the associated units.

Initials: ____________

Code and governance	Decentralized. No central party controls the protocol or can alter its monetary rules. The code is immutable; recorded transactions cannot be reversed, and the supply cannot be inflated.

II. Conformity with Core Sharia Precepts

Mal (property)	EPIC is lawful property of recognized value, exclusively owned and transferable.
Thaman (currency)	EPIC bears the attributes of money and serves as a medium of exchange within the community that adopts it.
No riba (interest)	EPIC pays no yield on holding or locking, and has no staking. A reward is paid for performed work alone.
No gharar (contractual uncertainty)	The quantity, the ownership, and the delivery of EPIC are certain.
No maysir (gambling)	EPIC is acquired by purchase or by performed work, not by chance.
Acquisition by mining	A lawful reward for a rendered service.
Privacy	Protection of lawful wealth (sitr al-mal): confidential by default, yet capable of selective disclosure.
